Convert Age to Days

Published by **medyah99** in **JavaScript** ▾

algebra   algorithms   math

Create a function that takes the age in years and returns the age in days.

Examples

```
calcAge(65)  →  23725

calcAge(0)  →  0

calcAge(20)  →  7300
```

Notes

- Use **365 days** as the length of a year for this challenge.

- Ignore leap years and days between last birthday and now.

- Expect only positive integer inputs.
